

CUSTOMER:

Hydrographic Confederation of the Guadalquivir River / EMACSA

CONTRACT:

Project and Technical Assistance for Site Management

BUDGET:

6.155.443,25 €

DATE:

2009

Description:

This project includes the construction of two 30,000 m³ storage tanks for holding treated drinking water, and the connections to both the current Purification Plant feeder system and the main distribution network.

The Villa Azul Purification Plant will thus increase its capacity from 52,000 m³ o 112,000 m³, equivalent to a drinking water supply for 320,000 inhabitants at 350l / hour / day.
